Excellent quality of dispensed drinks

Modular and flexible configurations

Innovative and elegant design

Simplified programming, loading and maintenance

Powerful 16 bit electronics

Programmable lock

No cup and jug fill option for guests

Revolutionary dispensing compartment and nozzles for optimum hygiene

ZENITH

Excellent drink quality

Zenith takes the vending market to new heights of innovation. Conceived for busy locations, the demands of delivering quantity are met whilst maintaining the highest quality drink.

Instant Version

FLEXIBILITY

With a wide range of configurations available, flexibility comes as standard, Zenith can quickly and easily be reconfigured while in normal operation. The modular design means many combinations can be obtained by simply changing from Instant to Fresh Brew or Espresso modules as required.

USER INTERFACE

Direct selection with variable strength options for tea, coffee and sugar, meeting the requirements of even the most demanding customers.

- Large and easy to read selection labels
- Tilted 4-line alphanumeric display
- Option of dual currency display
- Visual countdown and audible tone to indicate drink ready
- Cup sensor allows use of own cup or mug
- Jug facility
- Programmable free vend and discount periods
- User interface complies with regulations for the disabled

Espresso Version

INNOVATIVE DESIGN

Zenith will complement any workplace or public location with its eye catching design, direct push-button selections, curved door and illuminated advertising panels, which are easy to customise.

NEW MIXERS

The new Necta mixers are characterised by their ease of maintenance and reliable dispensing of creamy drinks, making them amongst the best available in the industry.

ELECTRONICS

Powerful 16-bit electronics with 2 flash EPROM's, giving total flexibility in customising the machine and allowing parameters to be programmed easily and quickly. An integrated real time clock with 4 time bands means that timed free vend, discount periods, flush cycles and energy saving mode can be programmed to occur automatically. Zenith permits simple retrieval of statistics and data.

PAYMENT SYSTEMS

Zenith is compatible with Executive, BDV and MDB protocols, allowing the use of all major coin and cashless payment systems.
